PROFILE

Driven to contribute meaningfully to the tech industry, with a focus on web development and expertise in front-end technologies, particularly React. Dedicated to producing efficient, well-structured code, I am committed to ongoing professional development in this fast-paced field. With a strong emphasis on collaboration, meticulous attention to detail, and a proactive approach to problem-solving

PROJECTS

Movefit

- MoveFit is a dynamic web application designed to help users discover and learn about various exercises tailored to specific muscle groups. The project leverages data from an API to provide detailed information and visual guidance on a wide range of workouts.

Wild Oasis

- Wild Oasis External is a user-centric web application developed with Next.js, featuring React Server Components, styled with Tailwind CSS, and secured with NextAuth for seamless authentication. It provides an intuitive experience for guests looking to book rental cabins and manage their reservations.
