SUMMARY

Full-stack developer with 1.5 years on production systems (Nuxt and Laravel, ASP.NET Core, Rails) and measurable digital marketing results: 8 Google Ads campaigns for a private hospital and technical SEO that raised Site Health from 90% to 98%. Strongest on the front end: TypeScript, React, Next.js, Vue. I work with AI agents every day (Claude Code, Codex): phased plans, written decisions and a review of every step.

SKILLS

Languages: TypeScript, JavaScript, PHP, C#, SQL

Front-end: React, Next.js, Vue, Nuxt, Tailwind CSS, HTML, CSS

Back-end: Node.js, Express, Laravel, ASP.NET Core, Rails, REST APIs, Auth (Better Auth, Clerk, Sanctum)

Data and tools: PostgreSQL, MySQL, MongoDB, Redis, Prisma, Drizzle, Git, Jira, Vitest, Playwright, GitHub Actions, Docker

AI workflow: Claude Code, Codex, parallel agent sessions in git worktrees, phased plans and ADRs, review of every step, Claude API, OpenRouter, MCP

Marketing: Google Ads, Meta Ads, GA4, Google Tag Manager, technical SEO, Semrush

WORK EXPERIENCE

Web developer | Medical Time Hospital — Feb 2025 – Present

Belgrade · Nuxt, Vue, TypeScript, Laravel, MySQL

- Built a patient chatbot that answers questions and books appointments, with a switchable AI provider.
- Shipped remote consent signing: the front desk sends a document to a tablet and the signature attaches to the order.
- Own i18n for a ~400k-line platform in 5 languages with localized URLs.
- Raised Semrush Site Health from 90% to 98% in one week: errors 6 → 0, warnings down 87%.

Front-end developer | Logistics company — May 2025 – Jul 2026

Remote (USA) · ASP.NET Core MVC, Razor, Rails, Hotwire, Leaflet

- As the UI developer on a two-developer team, redesigned 40+ TMS forms into modular multi-step wizards.
- Built a live Leaflet shipment map with stops, truck location and ETA per stop (Rails, Hotwire).
- Rebuilt the safety and finance screens as standard grids and modals, via Jira and code review.

Freelance web developer and digital marketing specialist | IT Expert — Mar 2025 – Present

Belgrade · Nuxt, Laravel, Google Ads, Meta Ads, GA4, GTM

- Build the IT Expert client platform (Nuxt, Laravel): portal, subscriptions and Raiffeisen billing covered by 133 tests.
- Manage 8 Google Ads Search campaigns and Meta Ads for a private hospital, with GA4 and GTM conversion tracking.
- Monitor campaigns continuously: added 370+ negative keywords and set CPC caps, so the account no longer pays for clicks costing up to 19× the average.

PROJECTS

Kafe | Django, Next.js, Flutter, PostgreSQL: Restaurant SaaS: POS, kitchen display and offline mode; my architecture, built with AI agents, 2,265 tests. sepic.me/projekti/kafe

Makaze | Go, React, Astro, PostgreSQL: Salon software: no double bookings, IPS deposits, fiscal receipts; my architecture, built with AI agents. sepic.me/projekti/makaze

GymAI | React, Express, Prisma: AI weekly training plans: Zod-checked output, model fallback, rate limits, 44 tests. github.com/sepicn/gym-planner

EDUCATION

BSc in Information Technology | Singidunum University, Belgrade — 2020 – 2024

Certifications: React: The Complete Guide (Udemy, 2024); The Complete JavaScript Course (Udemy, 2023); JavaScript Algorithms and Data Structures (freeCodeCamp, 2023)

Languages: Serbian (native), English (fluent (C1)), Spanish (basic (A2))
